BANK OF INDIA NEW YORK SELECTS GIFTS SOFTWARE'S "GIFTSWEB EDD" ANTI-MONEY LAUNDERING SOLUTION

December 2007 New York, NY -- GIFTS Software, a leading provider of funds transfer, e-banking and anti-money laundering solutions, announced today that Bank of India New York has selected the "GIFTSWEB EDD" anti-money laundering solution.

The implementation of the automated GIFTSWEB EDD product will assist the Bank in meeting BSA/AML compliance regulations as dictated by the USA Patriot Act. GIFTSWEB EDD is comprised of the five following modules, each of which can be implemented separately or as a total solution:

- **Subpoena/Inquiry Module** – allows the user to perform real-time inquiries against a database of transactions and respond to regulators, subpoenas or internal inquiries.
- **Profiler Module** – Provides a library of AML & terrorist financing detection scenarios and the ability to filter transactional or customer data against various lists, such as PEP, FinCEN 314a, OFAC, and internal lists.
- **Patterning Module** – develops transaction pattern detection scenarios for each account or group of accounts allowing comparison of activity periodically to report unusual variances.
- **OFAC/Sanction List Module** – allows automated interdiction list filtering of transactional & customer data via real-time or file-based interface.
- **CIP Module** – scans new accounts in real-time or batch against any sanction list in order to comply with Section 326 of the USA PATRIOT Act.
